

Specifications

DESCRIPTION AND LOCATION	Built by Jack Resnick & Sons in 1987 and designed by Emery Roth & Sons, this 43-Story, mixed-use building at the corner of Broadway and 56th Street combines an 8-story, 292,382 SF commercial/retail base and a 34-story, 480-unit luxury residential tower, Symphony House. With its rich, polished carmen red granite façade, clean lines, handsome plaza and impressive office and residential lobbies, the building is among New York's most impressive mixed-use properties.
LOBBY	Enter a dramatic double height space with bush hammered Bianco Carrara floors flanked by walls of alternating black metal ribs, LED backlit glass and streaming video monitors. The black metal ribbing is a nod to analog grooves in vinyl records, the backlit LED references digital light reading media and the monitors are inspired by music videos. One is greeted by a curved black metal ribbed concierge desk which feeds into glass turnstiles and a white glassed elevator lobby.
BUILDING AREA	292,382 SF
FLOORS	8 Floors Floors 2: 33,941 SF Floors 3-7: 34,523 SF Floor 8: 33,949 SF
